

The Trusted Source for Enterprise AI

Where AI Innovation Meets Enterprise Control

Centralized Control

Gain End-To-End Visibility
Over The AI Ecosystem.

Simple Access

Consolidate All AI Models
Into A Single Hub.

Accelerated Delivery

Streamline The Path To
Impactful AI In Production.

THE CHALLENGE

Uncontrolled AI model usage creates misuse risks and inefficient delivery.

Widely dispersed AI/ML models create governance blind spots, increase compliance risks, and make production processes manual and error-prone.

THE SOLUTION

Accelerate AI innovation with enterprise-grade control and trust.

JFrog AI Catalog provides clear visibility and precise control over AI model usage and development. It enables rapid deployment and easy access to models for increased productivity.

THE RESULT

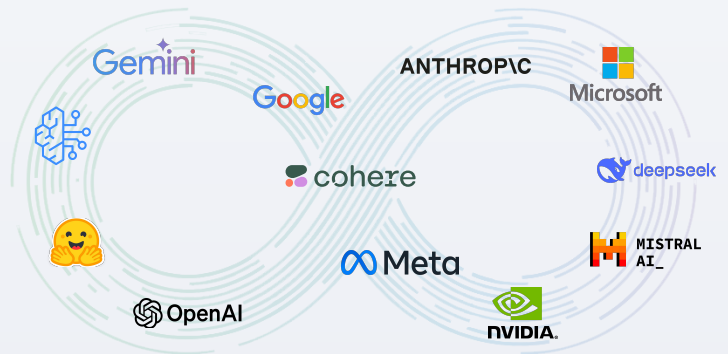

Proven Results in Rapid, Trusted Delivery.

Over 7,000 of the world's most demanding organizations, including the majority of the Fortune 100, rely on the JFrog Platform to secure their software supply chain. The same trusted framework for security and governance is also purpose-built for your AI models. This gives you a unified platform to control your AI development end-to-end.

Unmatched Integration & Ecosystem Freedom:

JFrog AI Catalog provides simple and secure access to the evolving AI ecosystem

- Access a broad range of AI models, from in-house creations to diverse external and open-source models, ensuring ecosystem flexibility.
- Achieve controlled ecosystem freedom by bringing all models under centralized governance within your organization's secure software supply chain.
- Govern model and AI component usage across your organization and easily trace the steps taken to bring a model to production.

Innovate without compromising governance, security, and compliance

- Centralize control over AI model usage, precisely governing which models are allowed.
- Manage model access and permissions, defining exactly which team can use each model.
- Ensure continuous security with automated model scanning and audit-ready evidence tracking.

Discover and access all models from a unified, trusted source

- Easily browse and search for new and existing models to streamline discovery and boost productivity.
- Effortlessly review all relevant model details and model cards for immediate, actionable evaluation.

Streamline AI model deployment and operations

- Deploy approved models with one click, eliminating infrastructure complexities.
- Securely connect to external model providers and APIs.
- Monitor deployments and usage patterns, tracking performance for operational insights.

A Better Way to Master Enterprise AI

The JFrog Platform is the single source of truth for over 7,000 companies. JFrog embeds trust and control directly into the model lifecycle, giving your teams the confidence to accelerate AI delivery and securely integrate it with core business applications.
