Essential Resilience for Modern Software Delivery

Ensure your software factory is "always on" with a contractual 99.99% uptime SLA
for your key software supply chain services.

THE CHALLENGE

For mature organizations in the AI-era, 99.90% is no longer "good enough"

At high-velocity software organizations and those delivering critical services, more than a few minutes of downtime can pose a major risk. Backlogged pipelines, idle developers, and missed SLOs lead to angry messages from executives or worse.

THE SOLUTION

Improve resiliency of your software factory with a 99.99% uptime guarantee

Premium Availability with the JFrog Platform gives you the mission-critical resilience required to maintain non-stop software delivery and is the only software supply chain platform providing 99.99% in-region uptime across registry, security, and governance services.

Services covered

JFrog **ARTIFACTORY**

JFrog **DISTRIBUTION**

JFrog **CURATION**

JFrog **AI CATALOG**

JFrog **XRAY**

JFrog **ADVANCED SECURITY**

JFrog **APPTRUST**

How it works

- **Premium Infrastructure**: Premium cells, strict density limits, and guaranteed resources reduce noise to ensure performance.

- **Application Enhancements**: Self-healing mechanisms, intelligent throttling, and decoupled architecture prevents issues even at the highest loads.

- **Top Tier SRE & Ops**: Prioritized incident handling, strict change management, and proactive observability ensure disturbances are caught before they become impactful.

Benefits

- **Enhanced Performance Predictability**: Maintain consistent execution speeds at all loads.

- **Zero-hassle Resilience Improvement**: No change to your architecture; "flip a switch" for higher resilience handled by JFrog.

- **Meet Regulatory and Business SLOs**: Your core services meet your rigorous standards.

The Leading Platform for Enterprise Performance

JFrog empowers organizations globally to JFrog empowers DevSecOps organizations globally to manage, secure, and govern the building blocks of all their mission-critical applications at scale—at deployment locations anywhere in the world.
